PROFESSIONAL SUMMARY

Computer & AI Engineering student (Ain Shams University / University of East London) who just finished a hands-on software engineering internship at Industrial Development Bank, where I built a full ASP.NET MVC task management platform solo, from requirements to deployment. Oracle-certified in AI Foundations, 1st place at a university research competition, and selected for the McKinsey Forward Program. I like owning a problem end-to-end and shipping something that actually works.

EDUCATION

Ain Shams University & University of East London (GPA : 3.42/4.0)	Cairo, Egypt
<i>B.Eng. in Computer and Artificial Intelligence Engineering (Dual Degree)</i>	2025 – 2029
– Relevant Coursework: Discrete Mathematics, Intro to Programming (C++), Object-Oriented Programming, Software Engineering	
Egypt British International School (EBIS)	Cairo, Egypt
<i>IGCSE Program – Cambridge / Oxford / Edexcel International Examinations</i>	2023 – 2025

TECHNICAL SKILLS

Languages: Java, C++, Python, C#
Web & Backend: ASP.NET MVC, Entity Framework, HTML5, CSS
Databases: Microsoft SQL Server, MySQL, Database Design
Tools & Other: Git/GitHub, JavaFX, Tkinter, Problem Solving, OOP, Agile Workflows

EXPERIENCE

Software Engineering Intern	Jul. 2026
<i>Industrial Development Bank (IDB)</i>	Cairo, Egypt
– Gathered requirements directly from managers and solo-built the IDB Task Manager end-to-end in ASP.NET MVC, SQL Server, and Entity Framework, taking it from BRD/PID documentation to a working deployment on the bank's test server	
– Designed a fair employee performance engine that scores task completion based on actual working hours, correctly excluding paused time and weekends so no one is penalized for time outside their control	
– Built role-based access control separating Manager and Employee permissions, including a read-only "View As" mode so senior managers can review their team's dashboards without being able to edit or delete anything	
– Built a secure file upload and download system so employees can attach proof-of-work documents to completed tasks, gated by authorization logic that checks each manager's reporting hierarchy before granting access	
– Wrote optimized database queries to power real-time workload and task-completion reports, and added an interactive task details view that loads instantly without a page refresh	
Virtual Summer Internship	Jul. 2026
<i>Commercial International Bank (CIB)</i>	Cairo, Egypt
– Completed coursework spanning Generative AI and prompt engineering, SAS-based financial data analytics, big data systems in investment environments, and foundational cybersecurity for protecting digital financial infrastructure	
Programming Teaching Assistant	Jul. 2025 – Aug. 2025
<i>Rehab Club Summer Camp</i>	Cairo, Egypt
– Designed and delivered a 4-week coding curriculum in Scratch for 30 students aged 11-14 , breaking down programming fundamentals into project-based lessons	
– Got every one of the 30 students to publish a finished project by the end of the program, achieving a 100% completion rate	

PROJECTS

Grand Azure Hotel Management System <i>Java, JavaFX, OOP</i>	April 2026
– Led a 5-person team to build a full hotel reservation platform – 30+ Java classes, 3 user roles (Admin, Receptionist, Guest), and a complete JavaFX GUI with 8 screens , all connected to a single serialisation-based database	
– Delivered full SWE documentation suite: UML class/sequence/DFD/use-case diagrams, FRS, NFRS, user stories, dependency map, and team task matrix, serving as the project's technical reference throughout development	
Weather Forecast Application <i>Python, Tkinter, OpenWeatherMap API</i>	Jan. 2026
– Integrated the OpenWeatherMap API into a Tkinter GUI and added structured exception handling for timeouts, bad inputs, and malformed responses, cutting the app's API failure rate from 18% to 3%	

HONORS & AWARDS

- **1st Place, Scientific Research Competition – Ain Shams University (Dec. 2025)** -
– Led a team through full project delivery, from problem design to final presentation, scoring highest across a 2-judge panel out of **10** competing teams

CERTIFICATIONS & COURSES

- **McKinsey Forward Program** – April 2025
- **AlMadrassa – Programming Fundamentals Track** – Jan. 2026
- **Oracle Cloud Infrastructure AI Foundations Associate** – Oct. 2025
